“Ashwagandha is one of my top recommendations to help brighten your mood and relieve stress. I insisted on the KSM-66 form because it maintains the natural balance of the herb's original constituents, which I believe will give you the best results.”

Dr. David Williams

KSM-66 Ashwagandha—The Most Researched Ashwagandha Root

In one randomized, double-blind, placebo-controlled trial, 64 individuals were given 300 mg of KSM-66 Ashwagandha root extract twice daily or a placebo for 60 days. At the end of the study, the Ashwagandha group demonstrated a significant reduction in stress-assessment scale scores compared to the placebo group. Plus, serum cortisol levels were substantially less in the Ashwagandha group.¹
